

Dear friends in Bonn, since December 2019, the world have been attacked by Corona Virus, the transmission of this virus is easily and rapidly, to combat this pandemic diseases our country have put in place different strategies such as confinement where some activities are stopped in the whole country. Because of stopping these activities to avoid Corona virus propagation, many people of Rwanda suffer from these measures that have been taken to fight against COVID-19.

In our Parish of Mushubi, we have many poor families who suffer from the consequences and they cannot get food easily. They do not even have means of protecting themselves against transmission and propagation of Corona virus. Then, through the CARITAS of our diocese has tried to help some poor families by giving them some food, but the aid remains insufficient compared to the number of poor families who suffer from the consequences of COVID-19.

Some measures and restrictions to combat corona have been put in place by the state, these are:

- Confinement ;
- Wearing of mask for everybody ;
- Closing of churches, schools; and all leisures activities ;
- Washing hands with a soap every time;
- Use of solutions of hydro-alcoholic for hands disinfection ;
- Social distancing.

Only essential activities are allowed others are closed, many people have lost their job contract.

IMPACT OF CORONAVIRUS ON HEALTH SYSTEM IN RWANDA

Covid-19 become a public health problem involving new prevention measures of diseases required other equipment and material of prevention, limiting productive activities, causing food and economic crisis.

PROJECT DESCRIPTION

Objective of the Project

Emergency intervention Project Against the consequences of Covid-19 is aimed to help poor families for surviving from this period of COVID-19.

Beneficiaries of the Project

The beneficiaries of the emergency intervention project against the consequences of COVID-19 are the poor families of Mushubi Parish who suffer from the consequences of COVID-19. These are 100 families who were selected. The poorest families' beneficiaries of the emergency intervention project against COVID-19 will receive subsidiary food such as (Maize flour, Beans, Oil and soap).
